

High Pressure Cleaning Systems

High Pressure Cleaners for heavy duty cleaning :

Stubborn dirt and grime at the industrial workplace can now be effectively dislodged with the latest international range of high pressure cleaners . These strong machines operate on pressure which compresses water and propels it forward like a jet. Forceful and powerful, it removes tough grease, rust, chipped paint and stains with equal ease.

The same pressure principle can also be applied for sand blasting, thus making this unique range an ideal cleaning solution for all those tough cleaning jobs at your workplace.

Unique Features :

- ❑ The machine has facility for hot water pressure cleaning.
- ❑ The high performance pressure cleaner can operate at temperatures ranging from 45 Deg C to 130 Deg C.
- ❑ Coupled with water jet action makes the machine highly effective in removing oil , tar and grease in any industrial setup.
- ❑ The hot water pressure cleaner provides pressures that range from 100 to 180 bar, ensuring high quality professional cleaning anytime.
- ❑ The water tank is placed on top of the boiler , the water is preheated thereby economising on energy.
