

# Anything that ends on your table, starts with ***Encon Engineers***

*Encon Engineers* for the past several years has specialised in Design, Manufacturing, installation & Commissioning of equipment, plants and machinery for the Process Industries.

*Encon* has under one roof, expertise in Project Design, Planning, Manufacture, Q.C. Installation and Commissioning, including Customer Training of equipment and its maintenance.

The philosophy that has always characterised the *Encon* strategy, is not to be content with acquired results; even if they are Excellent, but to meet our unswerving commitment to provide “*Just in Time*” services, when possible or very fast assistance wherever required, both for the supply of plant / machinery and their after sales service

The name *Encon* is synonymous with Quality, Cost Effective Operating Features, High level of Efficiency & above all a sense of commitment to clients and their specific needs.

*Encon's* history is one of gradual but continual Growth. It's our humble efforts to strive for the best. In order for you and your company to appreciate what we at *Encon* have to offer, you will have to know us better.

The flagship of *Encon Engineers* is **Encon Consulting Engineers**. Half decade back it was established by a group of engineers in Pune, a highly industrialised and strategically located city in India. With their high degree of commitment and exposure to both African & Indian Industrial market, Encon could gain confidence of clientele from African Market and gradually moved from providing technical consultancy to the supply of plant & machinery and then to integrate complete process plant on a Turnkey basis.

**Rakhoh Enterprise**, another Pune based company of repute for supply of Boilers, Specialty & Coded Pressure Vessels for Process Industries, Cement, Sugar Plant etc. came along and association grew.

Another Kenyan Company **Deekay Consult**, was instrumental in providing strategic support to **Encon** & **Rakhoh** for African region, joined the group and *Encon Engineers* was born.

Now for providing a single source support to all our customers, resources of the group companies are being consolidated under “*Encon Engineers Pvt. Ltd.*” (Proposed).

## **Encon's Business Philosophy:**

Every customer's requirements are studied and understood before making meaningful proposals. State of art Computer Aided Design tools with latest techniques are adopted to provide cost effective solutions. Even standard machinery is modified at design & manufacturing stage, to make it adaptable to the local conditions. This is to ensure trouble free operation of the plant / machinery for years to come.

The Optimum Quality Standard at every stage of service & manufacture is maintained. For the Turn-Key Projects, equipments are so designed that, the erection and commissioning time at site is minimized. The smaller projects are shop assembled as per site layout to achieve quick installation plus obtain shop assembled quality of the job. The third party inspection such as SGS, Lloyds etc. is also carried out on request.

We regularly conduct training courses for our customers and also impart full on site training to plant operators during erection & commissioning of the project / machinery to gain operator's full participation and thereby ensure trouble free operation of the plant / machinery for years. Needless to say that we attach prime importance to the After Sales Services, this is available to all our clients in shortest possible time on demand.

### **Encon Engineers at your service for,**

- \* New Project Report & Project Evaluation.
- \* Audit for Energy Conservation
- \* Technology / Know How Transfer.
- \* Rehabilitation of old plant/machinery.
