

Milking Machine Accessories:

- Milk Claws for high yield Cows.
- Pulsator for steady rate & animal comfort.
- Vacuum regulator for efficient milking.
- SS Teat Cups & High grade rubber liners are durable, hygienic and easy to clean.

Milk Flow Meter:

- Easy and accurate Milk Collection reading.
- C.I.P Cleaning facility.
- No milk wastage.
- Constant volume sample can be drawn.

Cleaning of Piping System:

Thorough cleaning of complete system is the key factor in maintaining top quality of milk. The CIP system available with two options, manual & fully automated. CIP system comprises of,

- Manifold kits for cluster cleaning.
- Plastic sink
- Three way valves
- Auto control unit (Optional)

Cleaning & Sanitising

- For cleaning the milking machine dip the cluster into a bucket of clean water dosed with proper quantity of Detergent to clean the entire milking unit. Further thorough cleaning of rubber parts & tubbses is effected with the help of specially provided brushes.
- The mastitis frequency can be significantly reduced by using Dipal for sanitising the teats after milking.

The special teat dip-cup makes it easy to carry out this important task.
