

## SEQUENTIAL BAILING. Fast and exact

The Encon sequential bailing system is the ultimate means of individual cow control in the milking parlour. All cow spaces are occupied in sequence as cows enter the parlour. Each cow has her own allocated position, which means enhanced cow comfort irrespective of cow size. Sequential bailing offers several advantages and unique features:

- ❑ Enhanced cow control.
- ❑ Correct milking unit positioning.
- ❑ Fast loading - the first cow can only occupy the first position.
- ❑ Fast unloading - double exit space.
- ❑ Complete integration with parlour automation.
- ❑ Operator control from anywhere in the pit.
- ❑ Fully galvanised robust construction.
- ❑ Compressed air operation - enhanced reliability and precise operation.
